DESCRIPTION:

The Zebra collection by Urso Luxury stands out for its elegant and refined design, which celebrates the harmony between the strength and delicacy of one of the most fascinating animals in the African fauna. Made of palladium silver, a precious material that gives a unique shine, this line expresses a perfect balance between elegance and modernity.

Each piece is decorated with black and white diamonds, which recall the characteristic contrast of the zebra's stripes, creating a fascinating and sophisticated play of light. The black diamonds add a note of mystery and intensity, while the white ones give brightness and refinement, accentuating the luxury of the design.

Another distinctive element of the collection is the use of malachite, a stone that, with its intense green shades, evokes natural beauty and timeless elegance. This contrast of precious materials and colors recalls the delicate balance of nature, where the strength of an animal like the zebra merges with its grace.

The pen of the collection, in particular, is a trendy accessory that not only functions as a tool, but becomes an object of desire and a symbol of elegance. The sinuous shape of the pen recalls the soft yet incisive lines of the zebra stripes, emphasizing the concept of delicacy combined with strength, just like the animal that inspires the collection.

Every detail of the Zebra collection is designed to pay homage to the beauty and refinement of one of the most iconic animals, through the use of exclusive materials and the craftsmanship that distinguishes Urso Luxury.
